

## 6. Update Interline Info:

This enables the user to update interline carrier information at any time.

|                   |                           |           |           |       |          |         |        |
|-------------------|---------------------------|-----------|-----------|-------|----------|---------|--------|
| 00/00/00 15:26:20 | <b>TRUCKING INC</b>       |           |           |       |          |         |        |
| F1ILPM S0001      | <b>INTERLINE PAYABLES</b> |           |           |       |          |         |        |
|                   | <b>FILE MAINTENANCE</b>   |           |           |       |          |         |        |
| Freight           | Interline                 | Interline | Interline | Split | Division | Payable |        |
| Bill #            | SCAC                      | Position  | Pro Nmbr  | Date  | Pct.     | Amount  | Amount |
|                   |                           |           | _____     | _____ | 00       | .00     | .00    |

This can be used to add an Interline pro number after it has already been checked in. Key in the desired changes and press **enter**, then **F2** to update.
